ABOUT US

BREW MONSTER was founded in 2018 and since then worked on dozens of commercially released projects. We cultivate a creative environment to enable the best work and deliver impactful ideas through our products. The studio involved in the development of many outsourcing projects from game dev, full art-style development, concept design, animation, UI/UX, 2D/3D art services and various IT platforms.

With skilled team and ambition to grow, we're hungry for providing breakthrough solutions and believe that constant innovation is the key to build successful products.

With a talented and ambitious team, we would like to reach the goals by accelerating the momentum of every individual working together and deliver quality products to enhance our competitive advantages and bring great experiences to our partners and communities.

MISSION

Our vision is to become an innovative technology company by delivering top-notch products & solutions to enhance life quality and build a better world. To be able to achieve this goal, we take the risk of looking for new, previously unknown direction and setting ourselves a high bar at the same time to be a world-class studio.

2D CONCEPT & ANIMATION

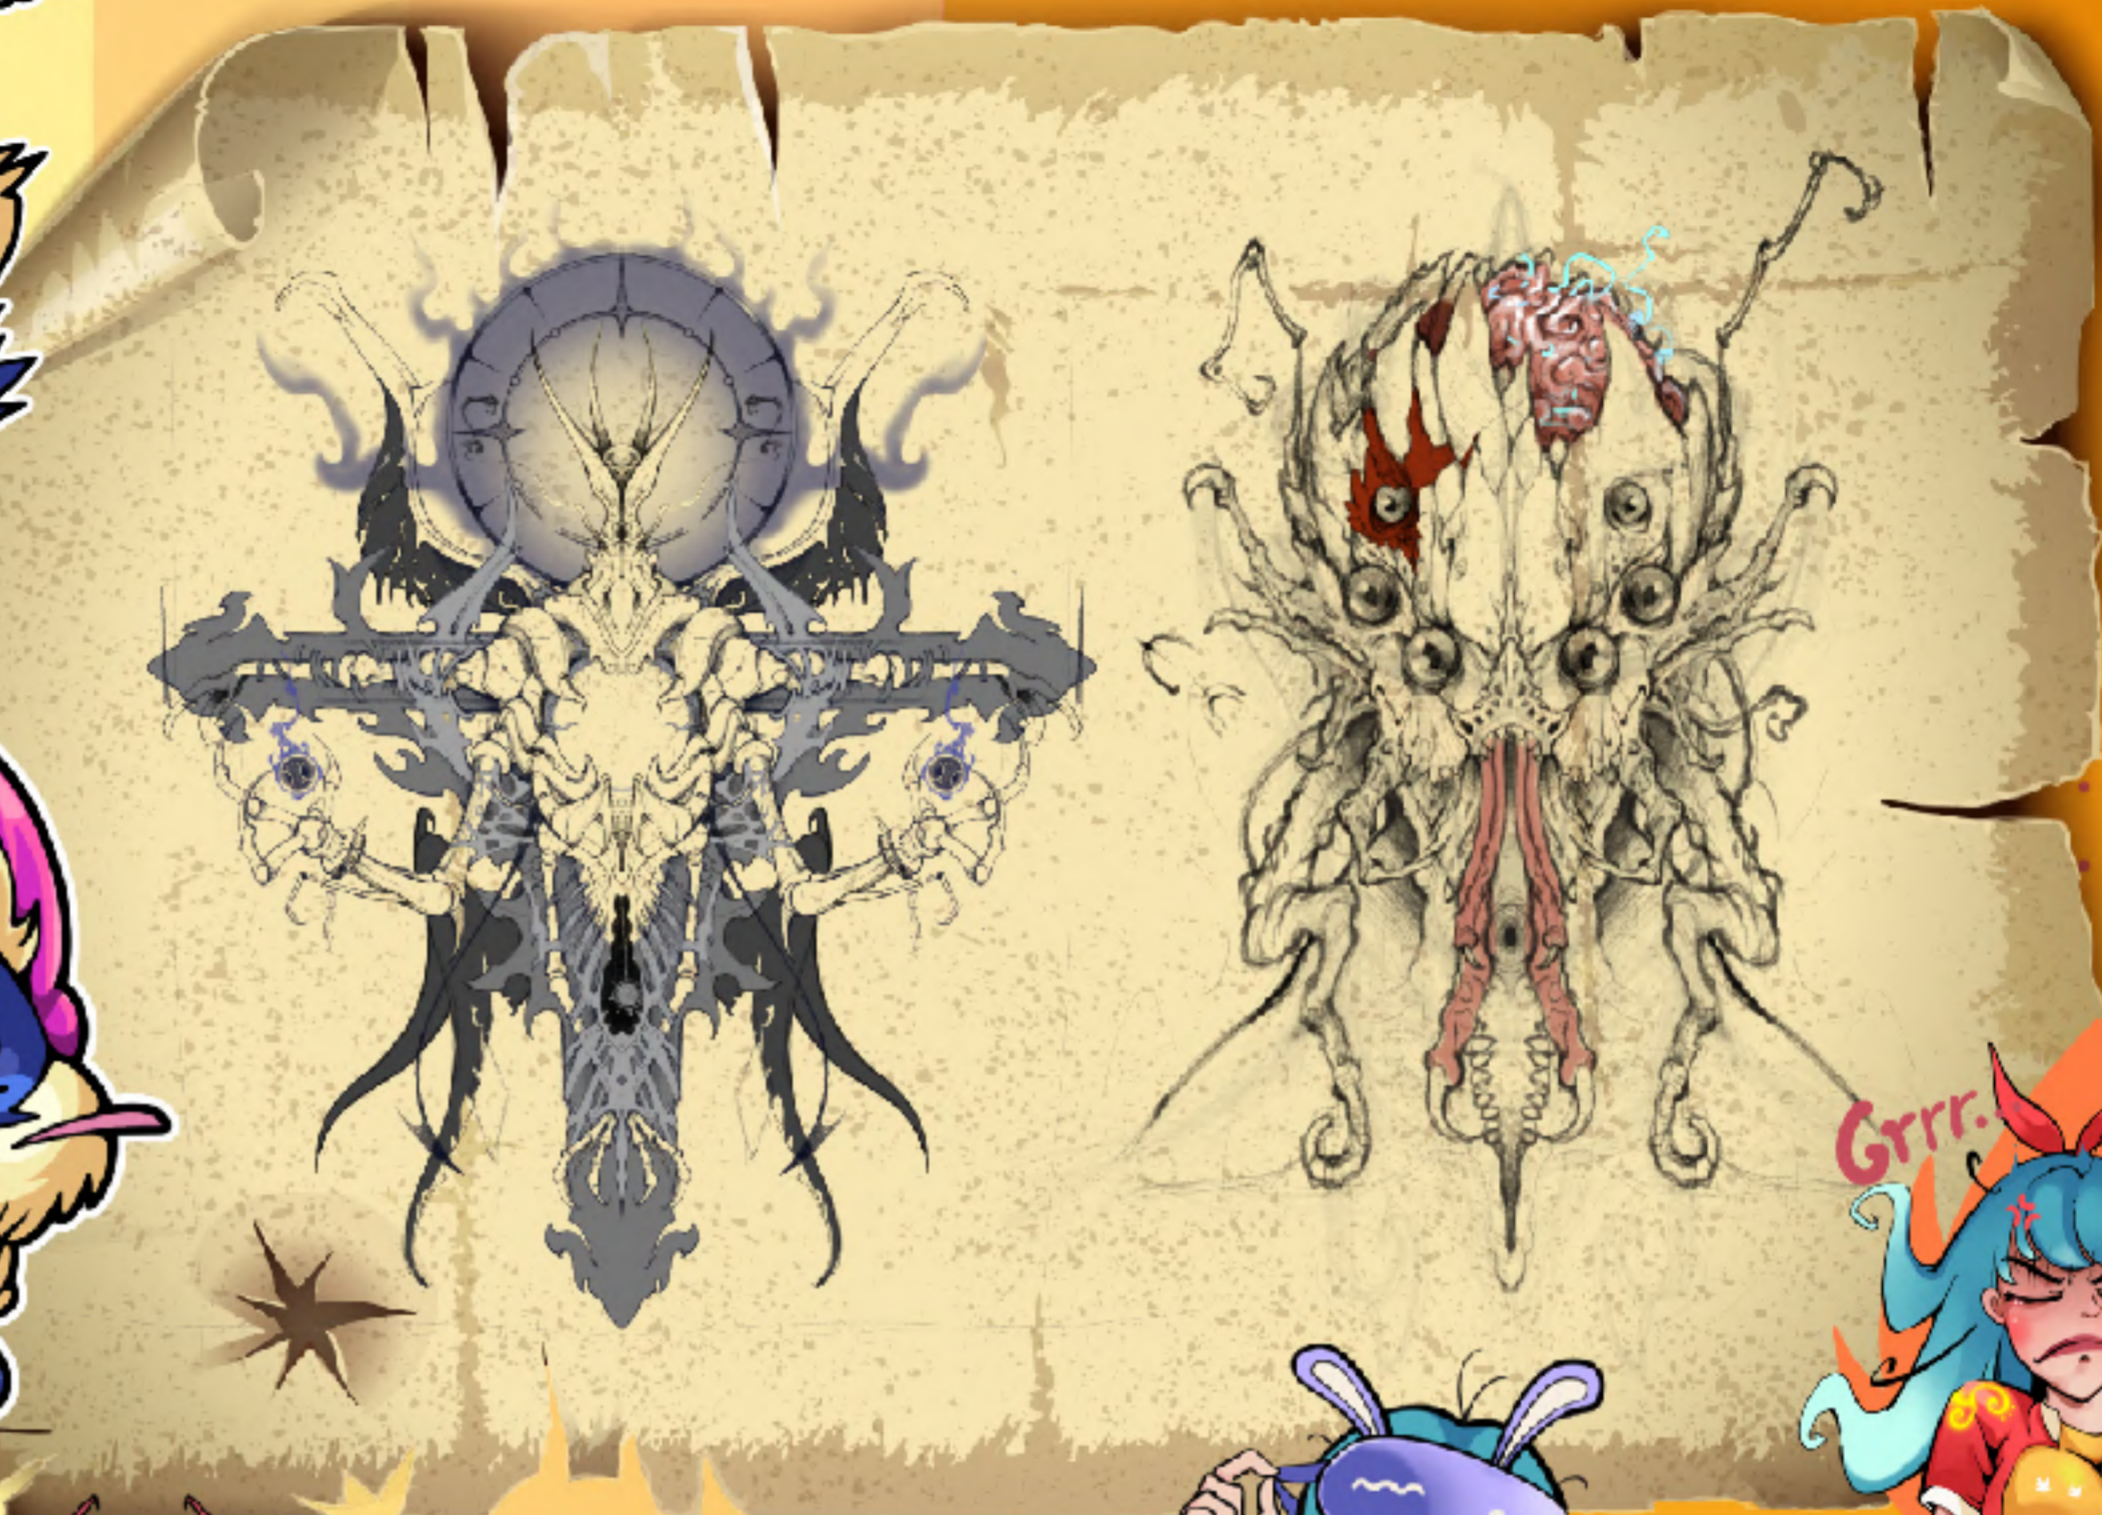

VGS offers a 2D CONCEPT & ANIMATION outsourcing service by talented and experienced animators.

We specifically create professional-level 2D animation with a full-cycle design of any complexity from scratch.

We are ready to use creativity to the fullest extent.

3D MODELING & ANIMATION

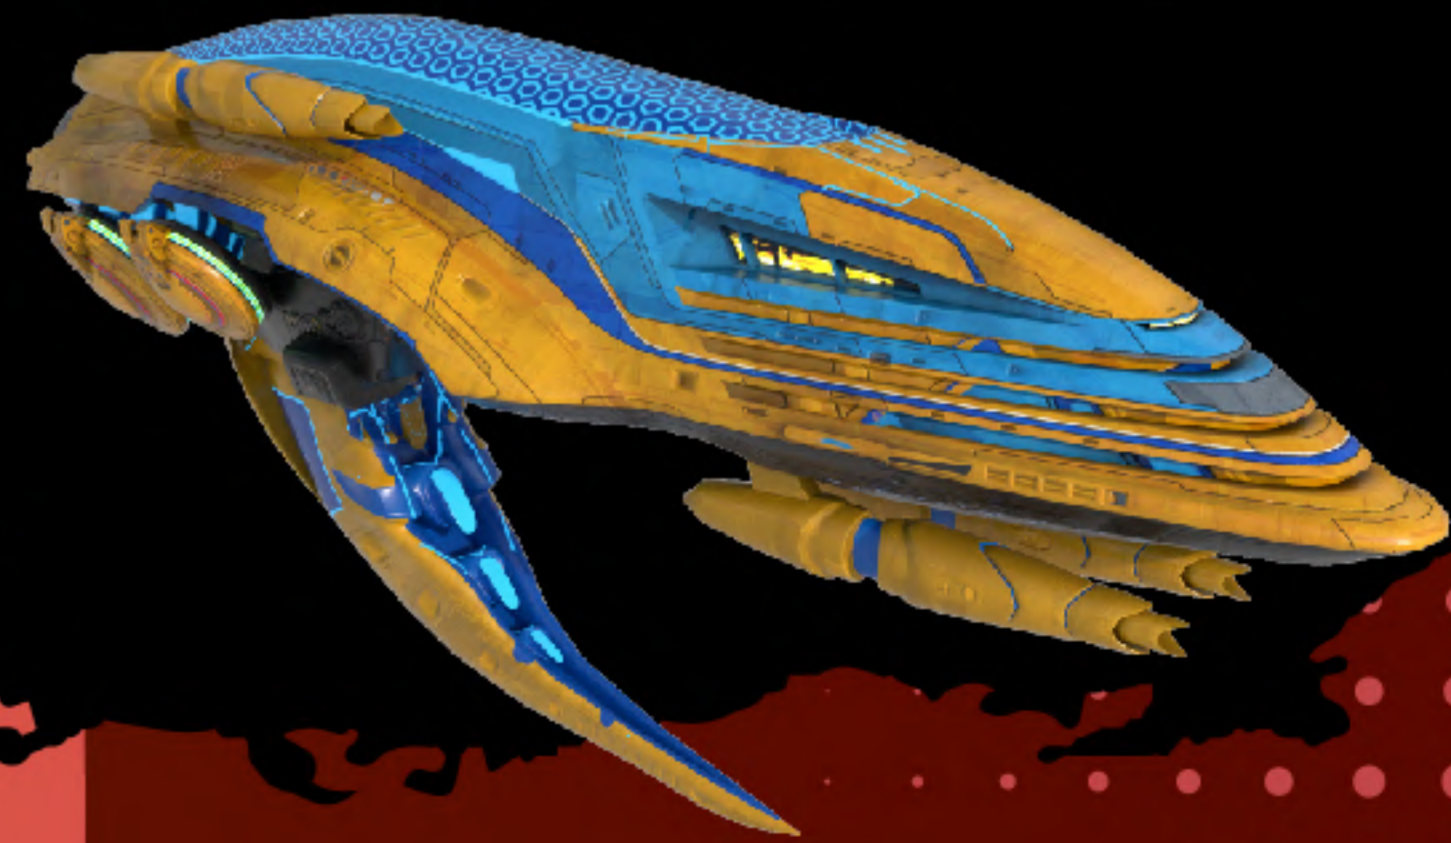

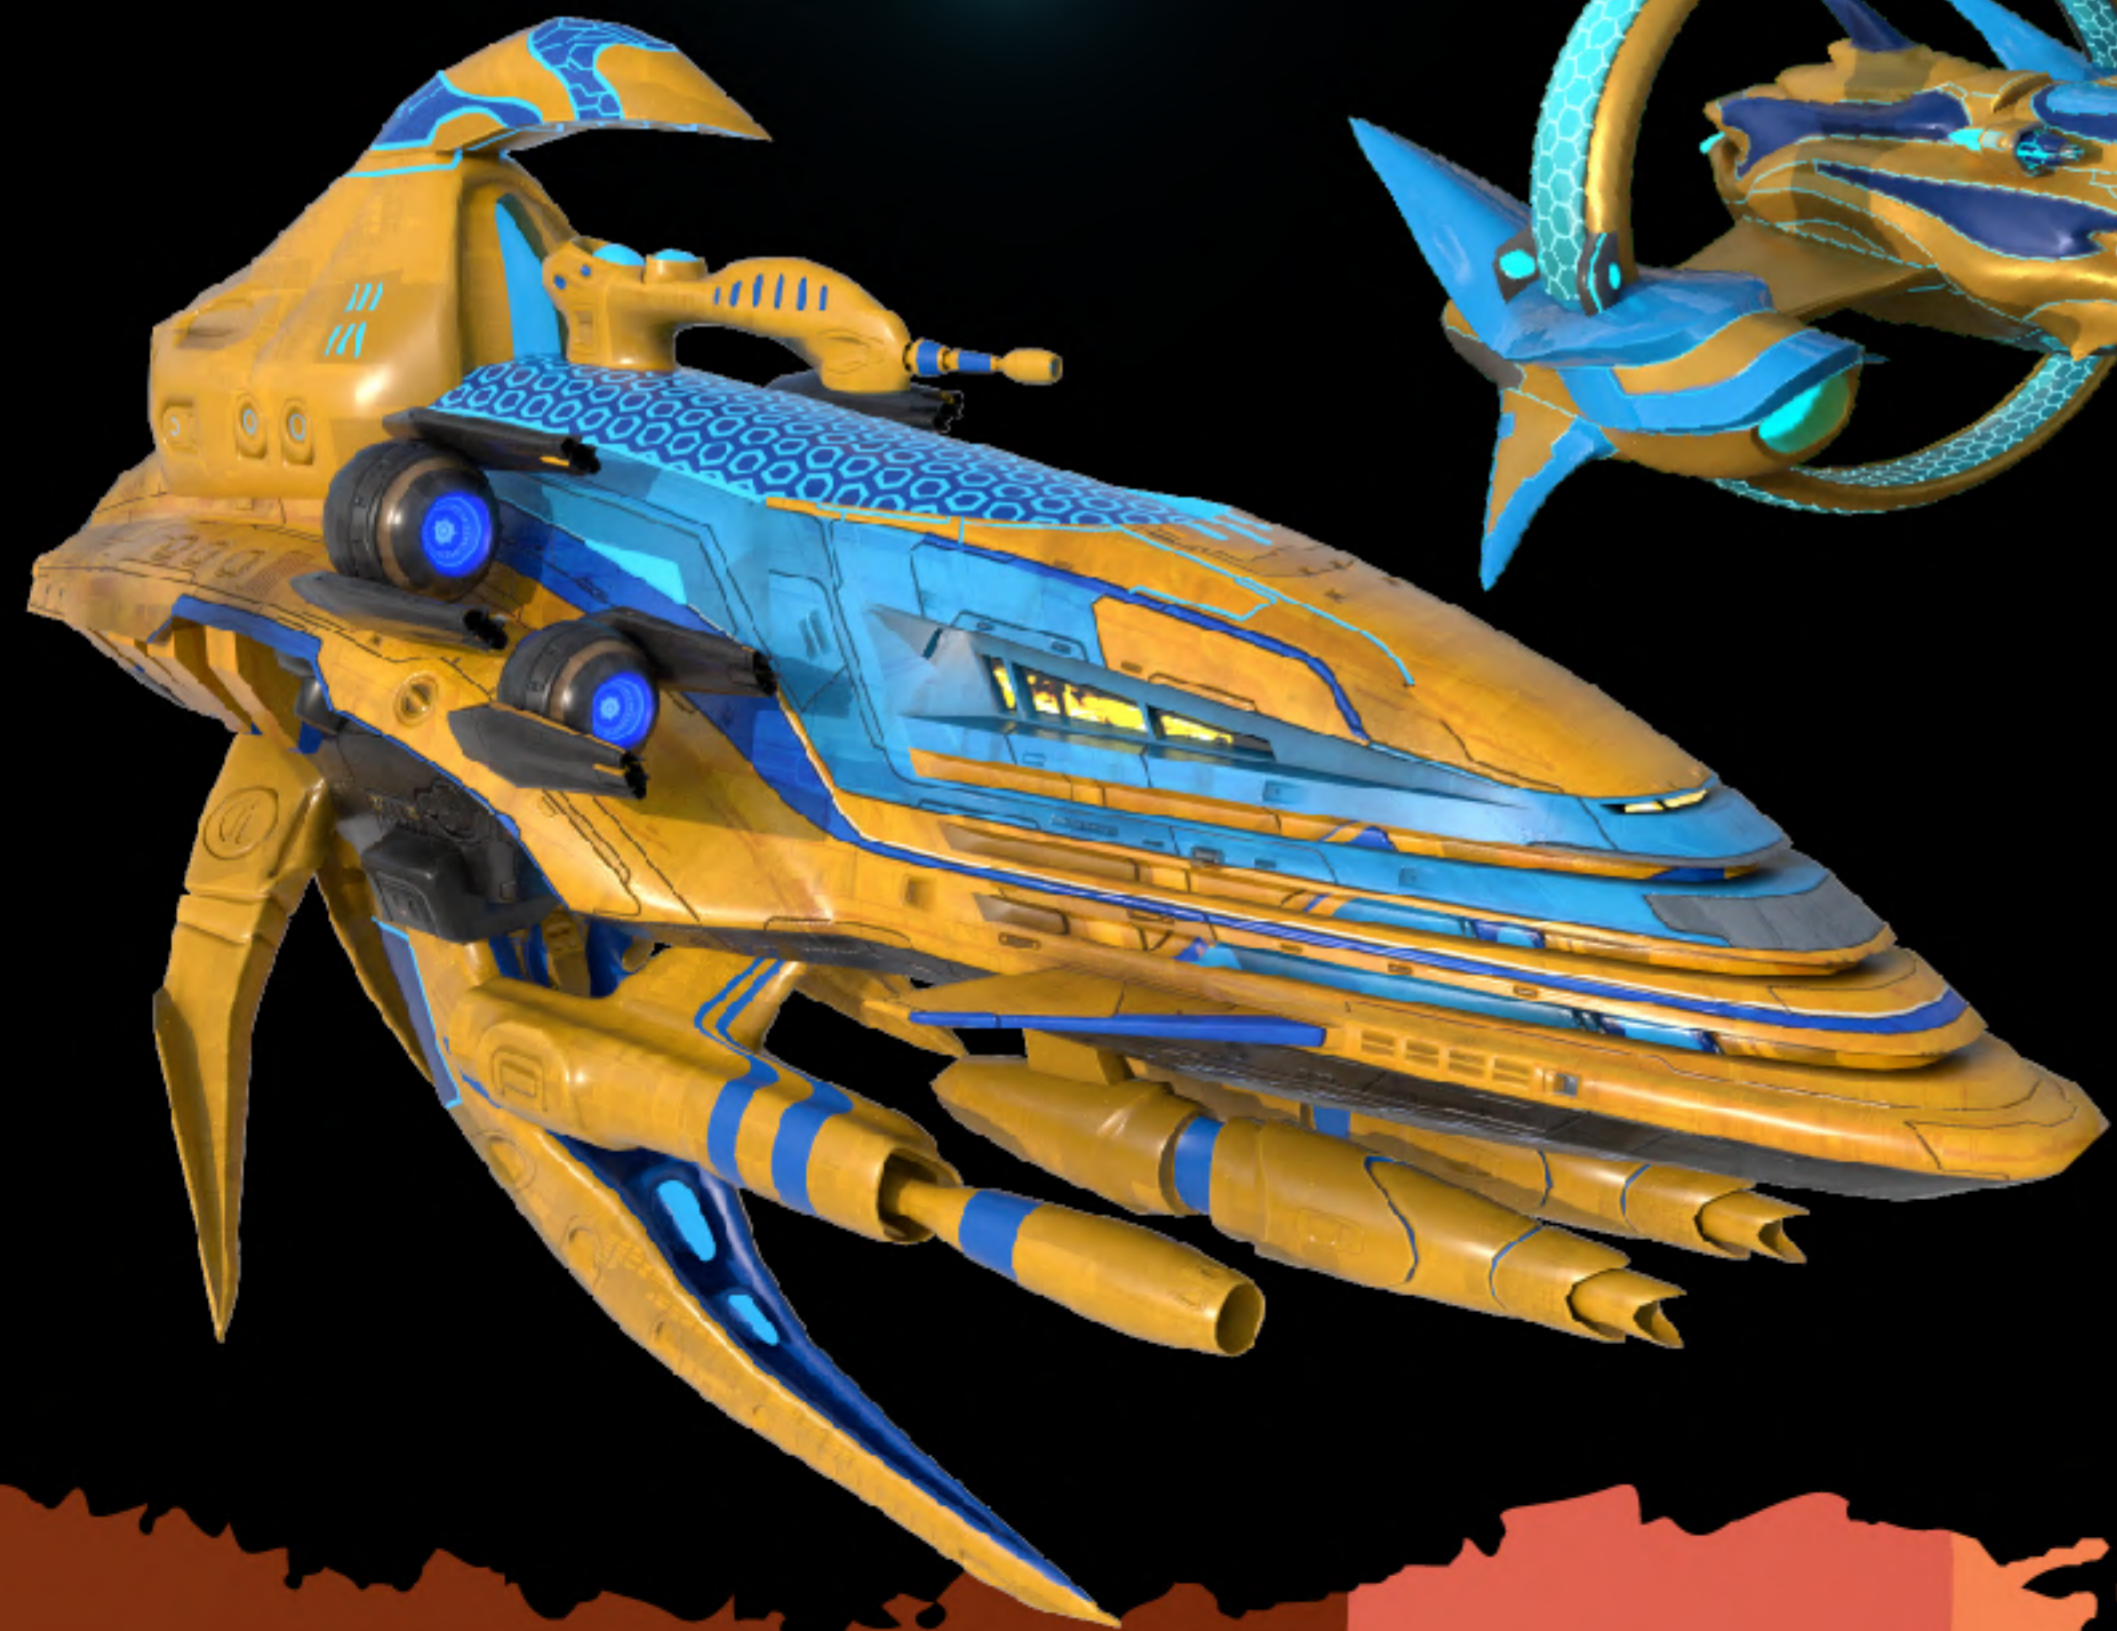

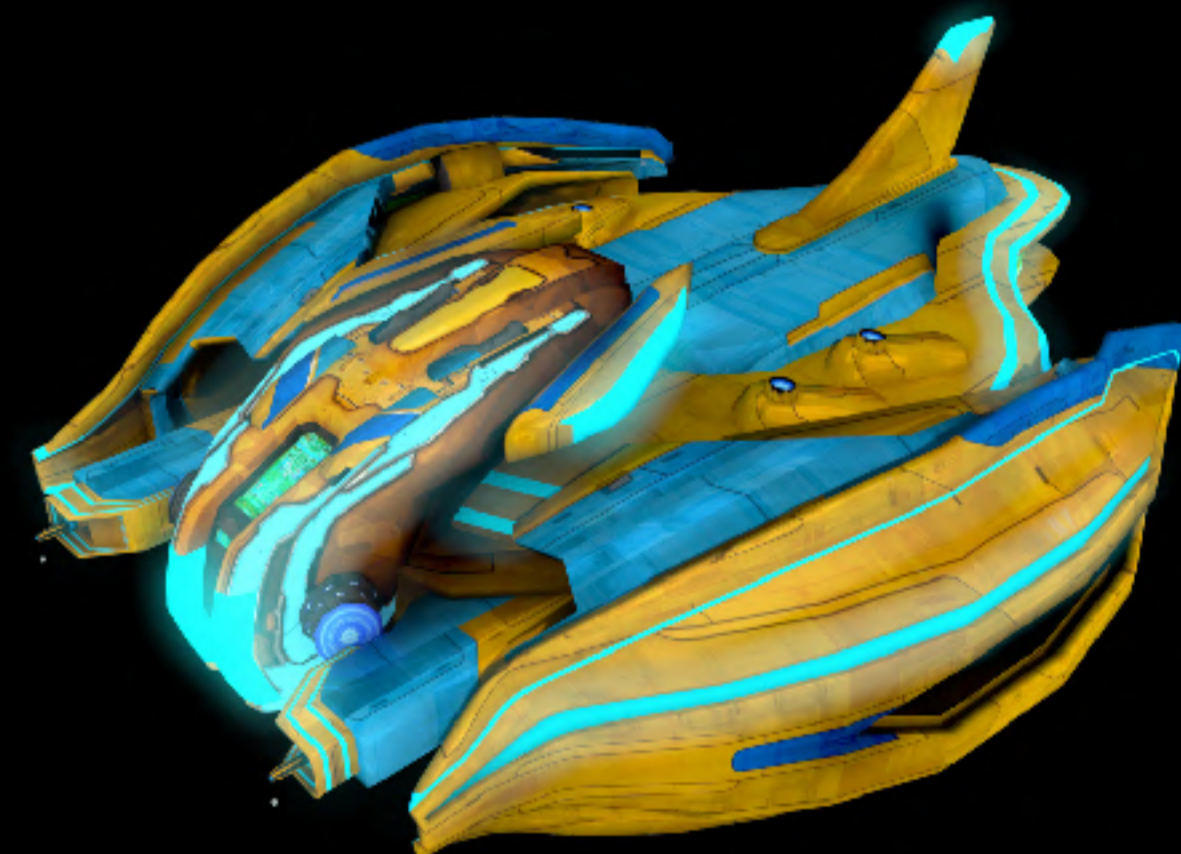

VGS offers professional 3D Modeling & Animation service for creating realistic animation and blockbuster-worthy effects.

Each of our 3D animation projects has maximum realism, natural movement, and unique style.

Our skillful animators accurately represent both the exterior and interior of the environments.

REALISTIC RENDERING SERVICE

A service that elevates technology, creating the fastest and most realistic 3D images.

Rendering reveals the physical characteristics of an object that are not visible on a flat image.

BLOCKCHAIN DEVELOPMENT

Keeping up with global trends, we extend our blockchain end-to-end development service powered by dedicated engineers and full-stack developers.

From concept to reality, we provide the best blockchain solutions, helping startups and businesses get closer to the economy of the future.
